Skills

- JavaScript | Java | Python | C | SQL | Node | Express | React | |React Native | Redux | NoSQL (MongoDB) | D3.js | Redis | Git | Github
- AWS | Cloud Computing | RESTful API | SMTP | PubSub | OpenCV | MediaPipe | Tkinter | HTML | CSS | Bootstrap | Figma | Canva
- Frontend | Backend | Full-Stack | English, Hindi – *All professional proficiency or above*

Experience

Full-Stack Developer

Ritual Guru

10/2024 - 12/2024

- Being a Full-Stack Web Developer, developed Many Webpages and worked on Cloud Services
- Developed Scalable APIs and implemented a Redis Database, increasing **API speed by 70%** and resulting in an overall Reduction of **cost by 60%** in the third-party Service and a **Reduction of 30%** in API Calls to core Services
- Built a Python-based **Palm Reading Module** for Ritual Guru using OpenCV, Mediapipe, and Hand Tracking Module (December 2024)

Software Developer

Pooja Har Ghar

02/2025 - 04/2025

- Developed a Mobile App - worked as a Freelancer on the PujaHarGhar Android App (April 2025)
- Designed and implemented responsive UIs for 5+ client projects and a college Android app using React, Figma and Canva, improving user engagement by 30%.

Education

Bachelor of Technology

Dr. APJ Abdul Kalam Technical University

Lucknow, UP, India

06/2022 - 06/2026

- Major in Computer Science Engineering

Projects

- **StudMart - A Student-Oriented Re-Selling Market-Place**

 [[github](#)]

- Built a student marketplace web app with real-time chat, college-zone-based listings, and authentication.
- Integrated AWS S3 for image storage and Redis for fast caching.
- Reduced page load time by 40% using optimized routing and DB queries.

- **Rural Rise** – Award-Winning Rural Industrialisation Platform (MERN Stack)

 [[github](#)] [[Demo](#)]

- Built a platform connecting startups and businesses with rural areas, offering affordable infrastructure and labour in exchange for knowledge sharing, skill development, and community upliftment.
- Implemented using MERN stack, JWT with SHA-256 for secure token authentication, bcrypt (adaptive hashing with Blowfish) for password encryption, and Mailjet SMTP for automated email services.

- **Palmy - Palm Reader**

 [[github](#)]

OpenCV and Mediapipe-based GUI-based (Tkinter) Project which takes hand images and, based on logic (from research papers and own logic), it will predict the Person's Nature and their traits, including Planets

Professional Summary

Results-driven Full-Stack Developer with hands-on experience in building responsive web and mobile apps using the **MERN stack** and **React Native**. Proficient in **Python**, with expertise in **OpenCV**, **MediaPipe**, and **Tkinter** for automation and computer vision. Skilled in **UI/UX design** (Figma), **SEO**, and backend tools like **Redis** and **AWS**. Built real-world projects like **StudMart**, **WAWY**, **Rural Rise**, and **Palm Reader**. Tech blogger at **Dix Tech YT**; fluent in **English** and **Hindi**.

-  Selected for **Free Training** among **250+ students** after excelling in an **Internship Exam**
-  Won **4th Prize** in **World Engineering Day 2025** for the project **Ritual Guru**
-  Organized an **Inter-College Coding Competition**, handling sponsorship, team management, and promotion

Others

- **CCC** : Course on Computer Concept by NIELET (2020)
- **Japanese**: Learning and will appear for N5 this year
